RHO ROD

With the RHO ROD people or landscapes contaminated by radioactivity can be energetically supported and harmonized. The RHO RODS lower the wavelength of the radioactive isotopes to the level of humans, to the level of hydrocarbon. With this, the damaging effect of radioactivity is greatly reduced (measurable!). In addition, the RHO RODS are also effective against electrosmog.

From a technical perspective, information is transmitted to the electrons of the radioactive isotopes, causing their vibrational frequencies to decrease to a level that is safe for the body.

A protective cover is available for this product.

Use on the body:
The treatment of individuals has shown that the potential of RHO RODS is very comprehensive. The RHO RODS are used in pairs. They are held vertically in the hands, the red caps pointing towards the ground.

Our consultants will be happy to assist you.

TECHNICAL DETAILS

Material: Glass, filled with granules
Size: Length 430 mm, Ø 30 mm
